

Class Activity 1 (Debating over a National ID Card): The events of September 11, 2001, resurrected the debate over the introduction of a national identification card for Americans.

- A) As a proponent of a national identification card, point out some benefits of its adoption.
- B) As an opponent of a national identification card, suggest some harms that may result from its adoption.

Class Activity 2

Divide in pairs, teaming with the person sitting next to you. Refer to Document A (The U.S. Attorney General Reports on the Patriot Act's Successes) and Document B (Surveillance under the Patriot Act) attached. The documents provide arguments respectively in support of and in opposition to the USA Patriot Act. Assign yourself to read one of the two documents, and the other to your partner.

Now consider the question "How effective has the Patriot Act been in combating terrorism?" Based on your reading, go to the T Chart below and add evidence supporting or opposing the USA Patriot Act (You and your partner has separate T charts; add your evidence in your side of the T chart).

Task I: After filling your T chart, compare your evidence with your partner's. When discussing the two documents, you and your partner should be thinking about which side of the debate you find makes the best argument and why. E.g., which source is more reliable and which source provides the best evidence to support its claim.

Task II: Based on your collected evidence, do you believe that the Act is a necessary tool for national security, or should it be repealed because it violates fundamental civil liberties? As a group, present what you found with the rest of the class.

Evidence in Support of Patriot Act	Evidence Against Patriot Act

Document A: The U.S. Attorney General Reports on the Patriot Act's Successes

John Ashcroft

In Afghanistan, our Special Operations Forces have deployed state-of-the-art weaponry and cutting edge tactics to hunt [the terrorist group] al Qaeda and destroy their safe haven. Here at home, our domestic warriors—federal, state and local law enforcement—have used the new legal tools and technology in the Patriot Act to hunt down al Qaeda, destroy their safe haven, and save American lives.

Let me be clear about something before I move on: Congress intended that the Patriot Act be used to save lives from terrorist attacks. In fact, there are a number of provisions that are only to be used to prevent terrorism or foreign spying. But other tools in the Patriot Act were developed to combat serious crime across the board, and we have used those general tools both in terrorism cases as well as in other cases, such as to catch predatory child molesters and pornographers.

We are a nation at war. That is a fact. Al Qaeda wants to hit us and hit us hard. We have to use every legal weapon available to protect the American people from terrorist attacks. Like the smart bombs, laser-guided missiles and predator drones employed by our armed forces to hunt and kill al Qaeda in Afghanistan, the Patriot Act is just as vital to targeting the terrorists who would kill our people and destroy our freedom here at home.

The Patriot Act's Success

I am pleased ... to have met with ... distinguished members of Congress and to have presented to them a report on how the Patriot Act has been our laser-guided weapon to prevent terrorist attacks. I have also been pleased to discuss how we have used the Patriot Act to save lives from violent criminals who prey on the vulnerable.

This report is an unprecedented compilation of dozens of real life cases from across the country in which the FBI and other law enforcement officials have used the tools of the Patriot Act to protect America's families and communities, and even to save lives. In fact, this report provides a mountain of evidence that the Patriot Act has saved lives. By tearing down the wall between law enforcement and the intelligence community, we have been able to share information in a way that was virtually impossible before the Patriot Act.

The removal of "The Wall" and the dramatic increase in information sharing allowed by the Patriot Act has enabled us to hunt down and dismantle terror cells in Portland, Oregon; Lackawanna, New York; and Northern Virginia. The information-sharing and coordination made possible by section 218 assisted the prosecution in San Diego of several persons involved in an al Qaeda drugs-for-weapons plot, which culminated in several guilty pleas. They admitted that they conspired to receive, as partial payment for heroin and hashish, four "Stinger" anti-aircraft missiles that they then intended to sell to the Taliban, an organization they knew at the time to be affiliated with al Qaeda.

The Patriot Act is al Qaeda's worst nightmare when it comes to disrupting and disabling their operations here in America. Our law enforcement and intelligence teams have never before been so integrated and coordinated, and technologically-equipped, to target the 21st Century threat of global terror.

This report will help reinforce what the majority of Americans already know: When it comes to saving lives and protecting freedom, we must use the Patriot Act and every legal means available to us.

SURVEILLANCE UNDER THE PATRIOT ACT

Hastily passed 45 days after 9/11 in the name of national security...

The Patriot Act was the first of many changes to surveillance laws that made it easier for the government to spy on ordinary Americans by expanding the authority to monitor phone and email communications, collect bank and credit

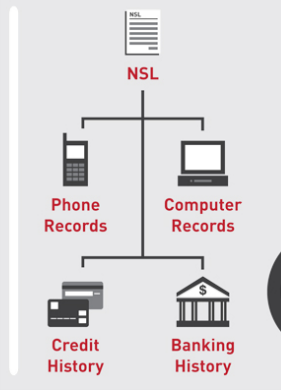

reporting records, and track the activity of innocent Americans on the Internet. While most Americans think it was created to catch terrorists, the Patriot Act actually turns regular citizens into suspects.

"I want to deliver a warning... when the American people find out how their government has secretly interpreted the Patriot Act, they will be stunned and they will be angry."

Senator Ron Wyden (D-OR),
May 26, 2011

SOURCE: 1

National Security Letters (NSLs) are issued by FBI agents, without a judge's approval, to obtain personal information...

SOURCE: 2

The conviction would have occurred even without the Patriot Act.

SOURCE: 3

Abuse of Privacy:

The Patriot Act does not require information obtained by NSLs to be destroyed – even if the information is determined to concern innocent Americans.

At least **34,000** law enforcement and intelligence agents have access to phone records collected through NSLs.

In response to 9 NSLs, **11,100** Americans' telephone account records were turned over to the FBI.

SOURCE: 4

The Patriot Act prohibits Americans who receive NSLs from telling anyone. These "gag order" provisions have been held unconstitutional in several legal cases.

Between 2003 and 2005, the FBI made **53 reported criminal referrals to prosecutors** as a result of **143,074 NSLs**.

143,074 NSLs

53 REPORTED CRIMINAL REFERRALS:

"Sneak & Peek" Searches:

The Patriot Act allows federal law enforcement agencies to delay giving notice when they conduct secret searches of Americans' homes and offices—a fundamental change to Fourth Amendment privacy protections and search warrants. This means that government agents can enter a house, apartment or office with a search warrant when the occupant is away, search through his/her property and take photographs—in some cases seizing property and electronic communications—and not tell the owner until later.

Of the **3,970 Sneak & Peeks** in 2010:
