Perspectives on Privacy

Today's Class – why violation of
privacy is an ethical challenge

Information Disclosures

Rewards or Loyalty Programs

Body Scanners

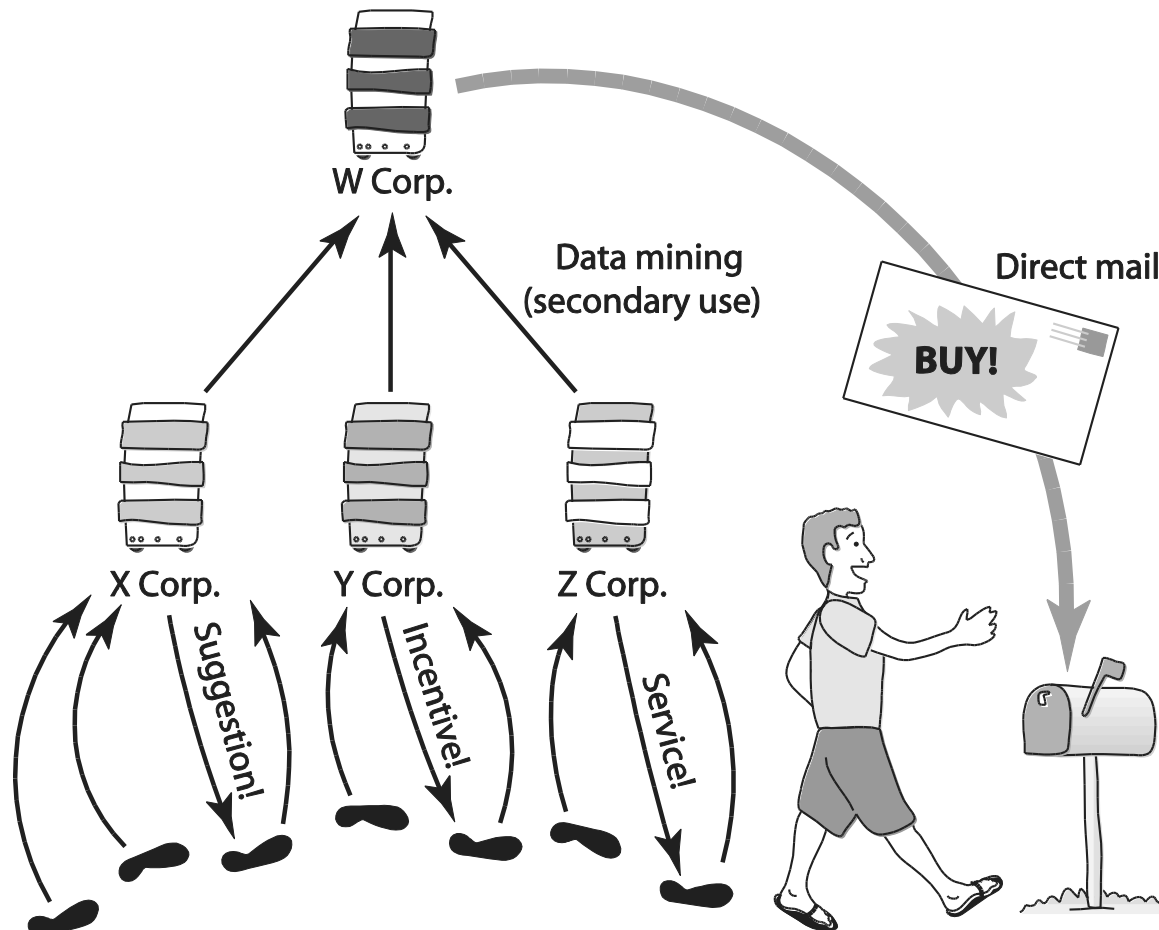

Implanted Chips

AI/Machine Learning

Secondary Uses of Information

How is secondary information
used? Some examples...

Google's Personalized Search

Collaborative Filtering

Microtargeting

Credit Reports

How Target Figured Out A Teen Girl Was Pregnant Before Her Father Did

Class Discussion

- If you voluntarily have your body scanned at a departmental store, who should own that information: you or the store?
- Should the store have the right to sell your body measurements to other business?

Sharing of Anonymized Datasets

POLICY —

“Anonymized” data really isn’t—and here’s why not

Companies continue to store and sometimes release vast databases of " ...

NATE ANDERSON - 9/8/2009, 7:25 AM

The Massachusetts Group Insurance Commission had a bright idea back in the mid-1990s—it decided to release "anonymized" data on state employees that showed every single hospital visit. The goal was to help researchers, and the state spent time removing all obvious identifiers such as name, address, and Social Security number. But a graduate student in computer science saw a chance to make a point about the limits of anonymization.

Latanya Sweeney requested a copy of the data and went to work on her "reidentification" quest. It didn't prove difficult. Law professor Paul Ohm describes Sweeney's work:

“

At the time GIC released the data, William Weld, then Governor of Massachusetts, assured the public that GIC had protected patient privacy by deleting identifiers. In

Almost all information can be “personal”
when combined with enough other
relevant bits of data

Privacy from the Individual Perspective (Acquisti et al 2015)

What should the individual be doing?

Individualistic Approach – privacy is a private good

- Trust people's ability to make self-interested decisions
 - The “Get over it” brigade
 - Zuckerbollocks – privacy is a private good (O'Hara 2013)

Individualistic Approach – privacy is a private good

- With respect to the individualistic approach, scholars question people's ability to manage privacy amid increasingly complex trade-offs

TECHNOLOGY

Suicide hotline shares data with for-profit spinoff, raising ethical questions

The Crisis Text Line's AI-driven chat service has gathered troves of data from its conversations with people suffering life's toughest situations.

Are individuals up to the challenge
of navigating privacy in the
information age?

Privacy as a public good?

- Even when the individual would rather be transparent and open to scrutiny, exposure will affect others.
- Accountability
- Security
- Trading data and market efficiency
- Chilling effects

The Real Harm of Crisis Text Line's Data Sharing

People who need help have access to a growing number of advice and care tools—some helpful, some harmful. Consumer protections need updating.

EU's "Right to be Forgotten"

- Also known as the "right to erasure", the rule gives EU citizens the power to demand data about them be deleted.
