¹Leading conferences in computer science (e.g., CHI, ICWSM, TheWebConf) are highly selective, undergo rigorous peer-review involving 3-4 expert referees, and intended for archival papers only. These conferences often exceed journals in their selectivity, visibility, and impact. Please see <http://portal.acm.org/citation.cfm?id=1743546.1743569> for details. Wherever available, the acceptance rate is provided following each citation. In the past decade, several CS conferences have also moved to a hybrid model with a journal component (e.g., CSCW,
